As a result, our total revenues increased by 41.3% year over year to RMB351.7 million in the first quarter. Such growth is a testament to our steady optimization of our automotive financing facilitation service offerings, which has helped to improve both our operational efficiency and service quality. It also speaks to our success in implementing cross-selling strategies to meet the targeted attach rate for our after-market services. Going forward, we plan to continue leveraging our capabilities in data analytics, technology innovation, and customized service offerings to sustain growth while further cementing our market leadership in the Chinese automotive transaction space."

Looking ahead, we will continue to invest in expanding our dealership network as well as improving the quality and efficiency of our services. As we continue establishing new partnerships with financial institutions and original equipment manufacturers (OEMs) to further enhance our service offerings, we are confident that our strong market position will allow us to navigate among the obstacles of this year's macroeconomic uncertainties."

- General and administrative expenses were RMB64.8 million (US\$9.7 million), or 18.4% of total revenues, in the first
  quarter of 2019, compared to RMB26.7 million, or 10.7% of total revenue, in the corresponding period of 2018. The

#### Use of Non-GAAP Financial Measure

In evaluating the business, the Company considers and uses Non-GAAP adjusted net income, a non-GAAP measure, as a supplemental measure to review and assess its operating performance. The presentation of the non-GAAP financial measure is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP. The Company defines Non-GAAP adjusted net income as net income excluding share-based compensation expenses. The Company presents the non-GAAP financial measure because it is used by the management to evaluate the operating performance and formulate business plans. Non-GAAP adjusted net income enables the management to assess the Company's operating results without considering the impact of share-based compensation expenses, which are non-cash charges. The Company also believes that the use of the non-GAAP measure facilitates investors' assessment of its operating performance.

Non-GAAP adjusted net income is not defined under U.S. GAAP and is not presented in accordance with U.S. GAAP. This non-GAAP financial measure has limitations as analytical tools. One of the key limitations of using Non-GAAP adjusted net income is that it does not reflect all items of expense that affect the Company's operations. Share-based compensation expenses have been and may continue to be incurred in the business and are not reflected in the presentation of Non-GAAP adjusted net income. Further, the non-GAAP measure may differ from the non-GAAP information used by other companies, including peer companies, and therefore their comparability may be limited.

The Company compensates for these limitations by reconciling the non-GAAP financial measure to the nearest U.S. GAAP performance measure, all of which should be considered when evaluating the Company's performance. The Company encourages you to review its financial information in its entirety and not rely on a single financial measure.

Reconciliations of Cango's non-GAAP financial measure to the most comparable U.S. GAAP measure are included at the end of this press release.
